Indian polish to colonial gems

Colonial Bombay architecture, hailed for its beauty and engineering, was as much the work of Indian contractors as British architects. A unique Instagram research project gives them their due. p.10

It was a challenge to track the architectural legacy of the British Raj, court building and townships, even to complete full-scale restoration. But the team at the National Institute of Design (NID) has done it. The team's research shows that the British Raj would not have been possible without the skill and hard work of Indian craftsmen.

JANE DUNN

The certificate is awarded to
Ar. Sujit Jadhav
by the **World
Wide Fund for
Nature**, which is
an International
n o n -
governmental
organization
which primarily
works in the
field o f
wilderness
preservation &
reduction of
human impact
o n t h e
environment.

This certificate acknowledges your pledge
and contribution to

**PLANT AND
ADOPT TREES**

I thank You

Sujit Jadhav

for dedicating the plantation in the name of

Vasant Jadhav

Your contribution will go a long way in helping conserve
nature for a safer, resilient and sustainable world.

BLOG RELEASE

TSAP released a blog on Blue and Green Infrastructure: A Sustainable Approach of Urban Planning written by Ar. Aditi Sontakke.

STUDENTS' TESTIMONIALS

My almamater TSAP must say an excellent choice to be one of the best architect. Even in this COVID pandemic situation the administration, staff and teaching faculty were at its best imparting the knowledge of architecture not missing the finest of details through its virtual online classes, submission, projects and exams.

I am really grateful to be a student of TSAP making a strong foundation of my future.

Paulomi Yogeshbhai
Third Year (B.Arch.)

It has always been a proud moment for me to be a part of TSAP and as a student, I feel it was the best choice I ever made. It has provided me the study environment, the infrastructure, the facilities all that a student expects from an institution. The professors are knowledgeable who were always there to lend their helping hands whenever I was in need and under their mentorship I was able to finish the journey of my first real-scale project.
